The Next-Generation Productivity Suite

01 Complete Intranet Platform

02 Productivity & Collaboration In One

03 On Cloud Or On Premises

Powered by HUAWEI HUAWEI CLOUD

OneOffice

The Best Productivity Platform. Period.

Turn your users' browser into a full-fledged digital office. Edit & manage files, share content, communicate via chat or video, all in one easy-to-use platform.

We have optimized the user experience to turn your organization into a hub of efficiency and collaboration. Start working from day one!

OneOffice

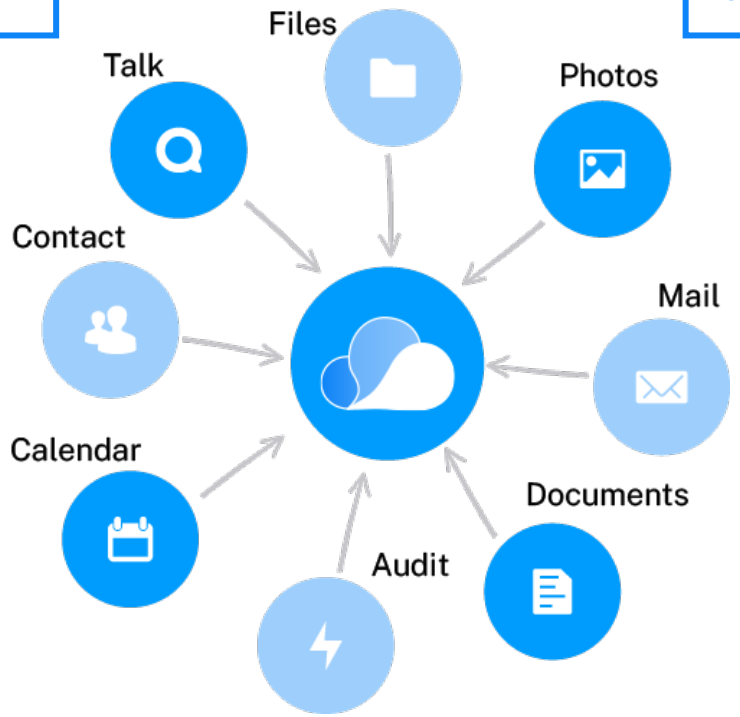
What We Offer

01

Video Conference

Whether it's one-on-one or 200 attendees, we got your covered. With an easy-to-use secure video conference with built-in drawing board and breakout rooms, online meetings are fun again.

Need help in a document or a presentation? Just click on a call button to securely collaborate real-time with your colleagues. Attach your work and notes to your conversations so you never look back.



02

Secure Cloud or On-Premises

Your data is securely hosted in a data center nearby, either Huawei Cloud or Amazon AWS, and managed by our team of senior dedicated engineers with decades of experience.

You can also opt for easy-to-deploy and cost-effective on-premises servers. For increased data resilience you can have your data synchronized on our cloud so you can securely access it anywhere, without a VPN!

All your features in one package!

0ne0ffice is the hub of your productivity and collaboration. A single package that includes it all, right from within your browser.

There are no hidden costs, license fees for additional features. All built-in from day one!

Hit the ground running!

Nothing slows down a new deployment like change management! The best tech gets bad press as team members get used to the new 'way'.

Not with 0ne0ffice. Easy to use by design, uncluttered and familiar interface and consistency in design (after all, it was all made in one piece). Supported by best-in-class documentation and videos, your users will fall in love with you!

OneOffice

Customizable out-of-the-box

You are not alone, there is no off-the-shelf solution that will 100% fit your organization and its culture.

0ne0ffice is not some platform built to satisfy some of your needs and hope you live with the rest. Having covered most industry verticals and many organizational cultures, we bet we have the customization of the magical tool you need. If not, just drop us a line and we'll be honest with you.

There is no such things as one-size-fits-all.

OneOffice

Core Design

0ne0ffice was designed by listening to companies and adding or iterating features. We spent thousands of hours testing and improving the core features to make sure they serve companies' core needs, while making 0ne0ffice extensible to add specific needs.

Our goal is to make collaboration and productivity second nature. We do this by making easy-to-use integrated tools that focus on user experience so you can focus on your work.

OneOffice

Features

Productivity Suite

Edit your Microsoft Word, Excel and PowerPoint documents directly in your browser. We built the BEST productivity tools. Supports all the features of the native application, except you can open your document faster, anywhere and edit them in a simpler and intuitive interface.

The built-in document editor was designed to be faster and easier to use than Office365 or Google Docs. We didn't cut any corners! Thanks to the deep integration into 0ne0ffice, you get 100% collaboration by design. Just give it a spin if you don't believe us.

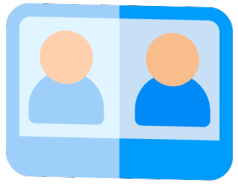
Security

All your work and content is 100% secure. Military-grade encryption is not optional, it's built-in. While other tools save money by bundling their users on the same database and infrastructure, we create a separate sandbox for you. It's your space.

Some applications (like healthcare, banking, legal, accounting) cannot use cloud solutions. There is no safer place than home, no matter what cloud-only providers try to convince you. Host your content on your premises and never lose any sleep!

OneOffice

Commonly Used Features



Video Conference

Online conferencing shouldn't be difficult. Built on the latest proven technologies we use your browser's built-in encoders to stream your video and audio. Makes for a faster, smoother and more secure experience.

But video conferencing is not just about communication. It's about collaborative work. This is why you can create permanent conversations for your projects and attach your work and files to them. This way your work history is never lost and you are organized from day one.

Files

Organize your files easily. Tag, create folders, add comments ... you are in control!

Work with your colleagues in shared workspaces. 0ne0ffice even extracts documents from your email and saves them for you in the right workspace.

The built-in full text search lets you locate you files in nanoseconds. A smart engine even tries to guess for you what you will work on next (we try to read your mind whenever possible).

Sharing

Share anything! Documents, folders, contacts, conversations. And do it simply.

You can even share outside your organization with time-sensitive links to make sure you don't forget to release your files.

Administrators can even control sharing rules to force password-based links or prevent external sharing. You are in control!

OneOffice

Commonly Used Features

Contact

What would you do without your contacts? It's all there, and easily accessible.

Create contact groups (e.g. finance, accounting, customers etc.) and share them with your team. Sync your contacts to your phone real-time so you are always in touch.

Group Chats

Chatting can be a great thing, if done right. We can easily get overwhelmed with the number of messages we have to handle. You can now organize your communications by project.

Link your documents to your chat or even have on-the-spot video call to handle something urgent. It's all there. At your fingertips.

Surveys

Feedback is the cornerstone of any improvement cycle. Create your surveys very quickly and get your results real-time.

From choosing your team's favorite restaurant to getting real-time advice on how to handle sticky situations. Collaboration becomes a way of life!

OneOffice
