ClassroomAPP

THE COMPLETE DIGITAL TEACHING & LEARNING PLATFORM

KEY FEATURES
WHAT MAKES CLASSROOMAPP WORK

MONITOR & CONTROL
ClassroomAPP is a real classroom manager, remotely controlling student devices. You can also launch content, websites, tests...remotely.

SECURITY
ClassroomAPP includes the typical security tools you expect to keep our students and their data safe.

REPORTS
ClassroomAPP is the only application that monitors everything your students are doing! This makes for amazing possibilities to correlate information.

COLLABORATION
A whole suite of social media types of tools are available (Blog, Wall, Chat), students can even create a space where they can collaborate in groups at will.

ASSETS
Many publishers obfuscate licence & user data, but now with ClassroomAPP you will have clear visibility on both usage as well as efficacy.

CONTENT
With ClassroomAPP you can include your content (online, PDF, media even apps) directly into your courses.

PARENTS
ClassroomAPP comes with full parent interface built-in. Parents can now access controlled parts of your course.

TESTING
A complete testing engine allows you to administer tests in-classroom, including the common question types, students recording audio or submitting documents.

STANDARDS
You can then precisely measure student performance per individual standard with ease.

SINGLE SIGNON & APPS
ClassroomAPP makes it a breeze to launch apps on student devices. We support all the common login methods.

TEACH
ClassroomAPP includes a full featured LMS as well. No more swapping apps in the classroom, it's all in one place.

PROJECT-BASED LEARNING
ClassroomAPP has developed with experienced educators the easiest tool to build, manage and monitor your PBL project.
